

Math PLUS Program

Math Advantage Tutoring Service

What?

The Math PLUS (**P**rogressive **L**earning **U**sing **S**ingapore mathematics) program is ideal for increasing math skills of elementary and middle school students, including students of ALL math abilities. The program is based upon the internationally recognized Singapore math curriculum. The Math Advantage Math PLUS Program is designed to actively motivate students and provide instruction that boosts mathematics skills.

Who?

Math PLUS is specifically designed for our elementary and middle-school students. Since it is an individualized progressive curriculum, it is appropriate for all ability levels. The program allows unlimited success for students who have fallen behind and for students wanting to jump ahead.

How?

After taking an initial placement test, students are assigned a specific level. The student attends Math Advantage and is guided through Math PLUS lessons. Our trained staff teaches and reinforces curriculum as needed with a 3 to 1 student to teacher ratio. Corresponding workbook assignments are then given for independent completion at home. The program promotes active thinking processes, communication of mathematical ideas, problem-solving and good study skills. Students find the curriculum to be concise and easy to read with clear directions.

When?

Math PLUS students usually attend two forty-five minute sessions per week. There is a 3-to-1 student to teacher ratio.

Why?

Math PLUS provides children with a solid math foundation. Math PLUS students will understand and enjoy math as they gain confidence progressing through each section. In today's world, it's important that our children learn to speak the "language of mathematics" fluently.

Cost: \$40 per week
